Introduction

The amplifier JBL® part number CST-2120 is a 2-channel stereo amplifier designed to drive two 70V or 100V distributed audio systems.

The amplifier CSA-2120 is a 2-channel stereo amplifier designed to drive two 70V or 100V distributed audio systems.

- Read the safety instructions carefully before using the amplifier.
- Read the 70V and 100V wiring instructions for the CSA-2120 amplifier.
- Always use the CSA-2120 amplifier with the appropriate distributed audio system.
- Do not use the amplifier with a power source other than the one specified.

Installation

CAUTION: Before you begin, make sure that the amplifier is disconnected from the power source and all level controls are turned completely down (counter-clockwise).

1. If needed, remove the amplifier from the rack by loosening the 19-inch (48.3-cm) rack ears (EIA RS-310B) by turning the screws counter-clockwise.
 - Rack ears are attached to the amplifier CSA-2120 amplifier (See Figure A).
 - Rack ears are attached to the amplifier (See Figure B).
 - Wall mount (See Figure C).
2. Connect the amplifier to the distributed audio system using the CSA-2120 amplifier wiring instructions.
3. Do not use the amplifier with a power source other than the one specified.

Note: The CST-2120 amplifier is designed to drive two channels of the CSA-2120 amplifier. The amplifier is designed to be used with a distributed audio system. If you are using the amplifier with a distributed audio system, please refer to the wiring instructions.
